DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Nakamura et al. (US 2001/0049943).

In regard to claim 1, Nakamura et al. disclose an air-conditioning system for vehicles. The system comprises a compressor 234, an evaporator 230, an electronic control unit 260 and temperature/humidity sensors 261-264. Refrigerant flow rate and compressor rpm are equivalent. When the engine is stopped, an elapsed time is measured with reference to the time the engine 110 stopped. That is, from the time the compressor 231 stopped, it is determined whether or not the elapsed time exceeds a first predetermined time. When the elapsed time exceeds the predetermined elapsed time, the measured compressor stop time is reset at S135, and thereafter the wet-bulb temperature T_{wet} of the evaporator 230 is detected at S140. The elapsed time T_o is about 30 seconds, and the later-described required operation time T_s is about 1 second.

In regard to claim 2, when the after-evaporation temperature TE is below the wet-bulb temperature T_{wet} , the engine 110 stops to stop the compressor 231. The compressor 231 remains at a stop until the compressor stop time reaches the elapsed time T_o . Thereafter, the on-off operation is intermittently carried out to operate the compressor 231 for the required operation time T_s (the intermittent operation mode). On the other hand, when the after-evaporation

temperature TE is higher than the wet-bulb temperature T_{wet} , the intermittent operation mode is stopped.

Allowable Subject Matter

3. Claims 3-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chen-Wen Jiang whose telephone number is (571) 272-4809. The examiner can normally be reached on Monday-Thursday from 8:00 to 6:30.
